

Reliable Secure Profile 1.0 – Package Contents

- ./License.htm** - WS-I "Evaluation License Agreement (Object Code Only) (the "Agreement")
- ./MANIFEST.pdf** - this file
- ./ReliableSecureProfile-1.0-Final.html** - human-readable profile document
- ./RSP_1_0_interop_scenarios (rev_15) .doc** - test scenarios document
- ./Analyzer-RSPrev57-Sep13-2010/**
 - common.xsl** - common formatting for testing tools
 - genreport.xsl** - legacy report generating XSL
 - make-plugins.xsl** - XSL for generating tapplugins.xsl from profile source
 - ProfileDocToHtml-2.0-xsl** - XSL for rendering profile source into human-readable HTML
 - ReliableSecureProfile-1.0.xml** - XML source for profile document
 - report.xsl** - XSL for generating human-readable test report from raw test report data
 - RSP-Analyzer-Release-NOTES.txt** - release notes for this version of the analyzer
 - tadriver.xsl** - analyzer engine XSL
 - tapplugins.xsl** - analyzer script derived from profile
 - testlog.xml** - sample log file for testing the analysis process
 - testreport.xml** - sample report file for testing the analysis process
 - UserGuide_TestAnalyzer.pdf** - documentation on the analysis tools and process
 - wsr-report.xsd** - schema (XSD) for the test report files
- ./RSP-Tools-Binary/policyTool-1.1/**
 - LICENSE.txt** - Apache 2.0 license file
 - policytool.jar** - JAR file containing the policyTool classes
 - ReadMe.txt** - documentation on using the policyTool
- ./RSP-Tools-Binary/WSILogger/**
 - httpd.conf.txt** - addition to the Apache2 httpd.conf file
 - KnownIssues.txt** - known issues with this version of the WSILogger
 - log.xsd** - schema (XSD) for the WS-I log file
 - log-rules.txt** - documentation on additional log file constraints beyond those expressed in log.xsd
 - README.txt** - documentation on installation, configuration, and operation of Apache2/WSILogger
 - DescriptionFileImporter/**
 - import.bat** - Windows command shell script for running Importer.xsl
 - Importer.xsl** - XSL for importing WSDL file(s) into log file
 - importSample.bat** - Windows command shell script that imports sample WSDL into sample log file
 - lib/**
 - LICENSE.txt** - Apache 2.0 license file
 - serializer.jar, xalan.jar, xercesImpl.jar, xml-apis.jar** - JAR files for Apache Xalan and Xerces
 - sample/**
 - *.wsdl** - sample WSDL files from BP scenarios
 - *.xsd** - sample XSD files from BP scenarios
 - WSI_03cf362d-35b5-47cf-bd14-e54350d92627.log** - sample log file w/out imported WSDLs
 - WSI_03cf362d-35b5-47cf-bd14-e54350d92627.xml** - sample log file with import WSDLs
- wsr/**
 - *.pm** - Perl modules for implementing message filters
 - *.psp** - Python Server Pages for implementing logger GUI
 - validateLog.pl** - Perl script for validating message log
 - wsilog.py** - Python script containing common classes and functions
 - wsilog.template.xsd** - stub WS-I log file with top-level element and namespace declarations

logs/ - directory for WS-I log files

temp/ - directory for raw message captures

./WSI-doctools/

ProfileDoc-2.0.xsd - top-level schema (XSD) for WS-I profile documents

ProfileDocToHTML-2.0.xsl - XSL for rendering profile source into human-readable HTML

ProfileMarkup-2.0.xsd - schema (XSD) for markup elements within a WS-I profile
