WS-I to Participate in Gartner Application Architecture, Development & Integration Summit

Web Services Interoperability Organization to Exhibit in Standards Corner

WAKEFIELD, Mass. – Nov. 23, 2009 – The Web Services Interoperability Organization (WS-I: http://www.ws-i.org) announced today that it is participating in the Standards Corner at the 22nd Annual Gartner Application Architecture, Development & Integration Summit (AADI: http://www.gartner.com/it/page.jsp?id=838226) to be held December 7-9 at Caesars Palace in Las Vegas. WS-I representatives will be on hand at the Standards Corner to answer questions about the organization and its work.

"Every year, the Gartner AADI Summit addresses the issues uppermost on the minds of IT leaders and this year is no exception," said Michael Champion, Chair, WS-I Board of Directors. "Best practices in a SOA environment are more important than ever as organizations seek to optimize their development resources in this tough economic environment. We at WS-I are pleased to partner with Gartner once again and look forward to sharing our Best Practices expertise with attendees of this important event." This is the fifth AADI Summit at which WS-I has exhibited.

Conference attendees are urged to visit the Standards Corner and talk with WS-I representatives about how WS-I Profiles establish Best Practices for selected sets of Web Services standards, to aid in the development and deployment of secure and interoperable Web Services. WS-I Profiles are available to the Web Services community at no charge; information about all WS-I deliverables is located at http://www.ws-i.org/deliverables/matrix.aspx. The Standards Corner is located in the Solution Showcase at the Summit.

About WS-I

The Web Services Interoperability Organization (WS-I) is an open industry organization chartered to establish Best Practices for Web Services interoperability, for selected groups of Web Services standards, across platforms, operating systems and programming languages.

WS-I comprises a diverse community of Web Services leaders from a wide range of companies and standards development organizations (SDOs). WS-I committees and working groups create Profiles and supporting Testing Tools based on Best Practices for selected sets of Web Services standards. The Profiles and Testing Tools are available for use by the Web Services community to aid in developing and deploying interoperable Web Services. WS-I also submits selected deliverables to standards bodies for eventual publication as international standards. WS-I deliverables may be downloaded at no charge from http://www.ws-i.org/deliverables/index.aspx. For more information, visit http://www.ws-i.org or send email to info@ws-i.org.
